1. Safety Precautions and Warnings

To Prevent personal injury or damage to vehicles and/or the code reader, read this instruction manual first and observe the following safety precautions at a minimum whenever working on a vehicle:

- 1. Always perform automotive testing in a safe environment.
- 2. Wear safety eye protection that meets ANSI standards.
- 3. Keep clothing, hair, hands, tools, test equipment, etc, away from all moving or hot engine parts.
- 4. Operate the vehicle in a well-ventilated work area; Exhaust gases are poisonous.
- 5. Put blocks on drive wheels and never leave vehicle unattended while running testes.
- 6. Use extreme caution when working around the ignition coil, distributor cap, ignition wires and spark plugs. These components create hazardous voltages when the engine is running.
- 7. Put transmission in PARK (for automatic transmission) or NEUTRAL (for manual transmission) and make sure the parking break is engaged.
- 8. Keep a fire extinguisher suitable for gasoline/ Chemical/ electrical fires nearby.
- 9. Don't connect or disconnect any test equipment with ignition on or engine running.
- 10. Keep the code reader dry, clean and free from oil, water and grease. Use a mild detergent on a clean cloth to clean the outside of the code reader, when necessary.

2.3 Vehicle Coverage

The MemoScan U281 CAN VW/AUDI Code Reader is specially designed to work with most Volkswagen and Audis sold Worldwide of 1990 or newer models. If a VW/AUDI has a 16-pin "OBD-II style" Data Link Connector(DTC), the code reader will certainly work, If it has an old-style 2x2 Data Link Connector(DTC), then it depends on whether there are 4 or 3wires connecting to the pins. If there are 4 wires each connecting a pin, then it will work. If there are only 3 wires, leaving one pin disconnected, then it will not work.

For VW/AUDIs with old-style 2x2 Data Link Connector(DTC), you need to have a 2x2 cabling adapter which is not included in this product package.

3. Operating Instructions

3.1 Reading Codes

CAUTION: Don't connect or disconnect any test equipment with ignition or engine running.

- 1. Turn the ignition off if it is on.
- 2. Locate the 16-pin Data Link Connector (DTC), and plug into the Code Reader cable connector to the DLC.
- 3. Wait for the LCD display to read "MEMOSCAN CAN VW"

- 4. Turn the ignition on. Needn't start the engine.
- 5. Press any key to display the menu or wait for 5 seconds for the menu to come up..

7. A sequence of messages showing the protocols will be observed on the display until the vehicle protocol is detected.

Not all the above protocols will be displayed. They will stop appearing after the vehicle protocol is detected.

• If an "LINKING ERROR!" message shows up, turn the ignition off for about 10 seconds, check if the code reader's OBD II connector is securely connected to the vehicle's DLC, and then turn the ignition back to on. If the "LINKING ERROR" message still shows, then may be the problem for U281 communicate with the vehicle.

10. If there are any DTCS present, then a brief overview with the total count of the trouble codes will be reported on the display.

DTC:08

11. Press the **SCROLL** button to read the DTCs. The DTC number will be displayed on the first line and sequence of the DTC currently being observed will appear on the second line..

12. A Flashing right arrow indicates that there are additional DTCs present. press the SCROLL button, as necessary, until all the code s have been shown up.

To view previous codes, press and release the SCROLL button to scroll through to the end, and then scroll starting from the first of the list.

3.2 Erasing Codes:

CAUTION: if you plan to take the a service Center for repair, DO NOT erase the codes from the vehicles' computer. If the codes are erased valuable information that might help the technician troubleshoot the problem will also be erased.

1. If you want to erase the codes, Pressing and Release the ENTER button and a message of "MENU: 1.DTC" or "MENU 2.ERASE" or "MENU 3. EXIT" comes up asking for your confirmation.
